

WOLF INDIVIDUAL VENTILATION UNITS KG FLEX SERIES

Maximum flexibility Customised air handling systems

Air flow
rates up to
350,000 m³/h

PERFECTLY IN TUNE WITH YOU.

NEW: WOLF KG Flex Series

Limitless range of applications & variations.

WOLF KG Flex Series

Some of the product highlights

Maximum air flow rates
Highly individual solutions
for requirements up to 350,000 m³/h.

Unlimited variety
Variable cross-sections and different cube sizes -
absolute flexibility in size and shape.

Highest quality standards
Casing and appliance properties to the highest quality standards.

Hygiene experts
State-of-the-art hygiene solutions fully VDI 6022-compliant.

Universally applicable
Developed for use in any environment for a wide variety of applications.

We're there for you

Limitless possibilities and impressive technical details:

Heat recovery optionally available

Energy-efficient and individually selectable
energy recovery systems of the latest
generation with **uncompromising hygiene**.
For example, RCS and TWHE are also possible.

Improved housing characteristics

New housing design made of 60 mm thermally
decoupled aluminium profile developed for the
**highest static and thermal requirements [L1; D1;
T2; TB2 - tested according to
DIN EN 1886]**.

Superior filter management

Quick-release filter systems
for flexible and fast filter
management. Many different
filter variants are possible for
every application.

Flip&Clean silencer

Easy maintenance and cleaning
of the silencer baffles.

Modern control system

As external control cabinet or integrated
into the appliance. Incl. easy BMS
connection.

Outstanding hygienic properties

Ideal for use even in environments
with stringent hygienic requirements.
Flat-line floors and surfaces entirely in
line with **VDI 6022**.

As standard
VDI 6022-compliant

Eurovent
certified

The unbeatable WOLF advantages

All-rounder and specialist - compact, modular, individual
As the market leader, our portfolio not only includes the best standardised and modular appliances, but
also highly individual products with the highest quality standards.

Benefit from a broad product portfolio
Combinations using plug-in compact appliances up to 20,000 m³/h, modular appliances developed for
medium air flow rates of up to approx. 40,000 m³/h and individual appliances from small to very large
air flow rates of up to 350,000 m³/h are easily managed.

Easy Lifting*
Lifting eyes for particularly straightforward lifting by crane or helicopter for maximum
time savings and minimised potential for errors

Control technology supplied ex works
Customised controls for each project. Partly or fully wired on request.

Perfected WOLF know-how
50 years of project experience and well over 100,000 air handling appliances installed worldwide as
the basis for the development of new technologies. Lowest leakage values, for example, through ultra-
modern sealing systems or quick-release systems. Combining all the advanced features results in HVAC
appliances of the highest technical sophistication.

WOLF Sales in your vicinity
Comprehensive and responsive sales network for professional and targeted cooperation.

Service excellence
Broadly based and competent service team; qualified for every service.

Eurovent certification
For all our individual appliances.

*only KG Flex max

For additional hygiene requirements

High performance run-around coil system

Highly efficient heat recovery throughout the entire
system Highly efficient heat recovery is possible, even
in areas with particularly stringent indoor air quality
requirements. Complete separation of the supply and
extract air flows means that no pollutants, moisture,
odours, bacteria or viruses can be transferred from one
flow to the other.
