

WOLF COMFORT ROTARY HEAT EXCHANGER VENTILATION UNIT

CRL/CRL EVO MAX FOR INDOOR INSTALLATION OR AS WEATHERPROOF VERSION

WOLF

THE EXTENSIVE EQUIPMENT RANGE

offered by system supplier WOLF provides ideal solutions for commercial and industrial buildings, new build and modernisation projects alike. The range of WOLF control units can meet any requirement for heating convenience. All equipment is easy to operate, highly energy efficient and reliable. Solar thermal systems can be swiftly integrated into existing systems.

WOLF equipment is easy and quick to install and maintain.

CONTROL ACCESSORIES	28-29
HEATER BANK	30
CONNECTING ACCESSORIES	31-32
EXTENSION MODULES	33-38
DEVICE ACCESSORIES	39-42
OUTPUT DIAGRAMS	43-47
TECHNICAL INFORMATION	48-52

Heating, cooling and ventilation
in perfect harmony together with the
optional WOLF Clima Split system

Numerous extension options,
e.g. silencers, heating and cooling coils or integration
with building management systems

Outstanding quality
through the use of high-quality materials and powder
coating as standard

Quick heating
of buildings thanks to integrated boost
damper

Easy handling
thanks to compact dimensions, the ability
to split up the unit (from CRL-3500) and the
components of the WOLF Easy Lifting System

High level of flexibility
thanks to a wide range of duct connection options
and the possibility of internal and external
installation.

Outstanding overview
of your system[s] with additional WOLF
Link Pro or BMK-T10

Cost-effective operation
through the use of highly-efficient EC fans and a rotary
heat exchanger with patented WOLF labyrinth seal with a
leakage rate of less than 2%

Play it safe

All devices are RLT and Eurovent certified, and meet the requirements of VDI 6022 and other relevant standards and guidelines.

9

ADVANTAGES OF THE WOLF COMFORT VENTILATION UNIT WITH ROTARY HEAT EXCHANGER

CRL AND CRL EVO MAX FOR INDOOR INSTALLATION
ALSO AS WEATHERPROOF VERSION

Connect & get going: The CRL and CRL evo max compact ventilation units were designed for ease of selection and commissioning. These units combine the advantages of plug and play compact ventilation units with a high level of variation thanks to a wide range of options. Ten sizes are available, from 1,300m³/h to 19,500m³/h, guaranteeing that you will find the right unit for any project.

Benefit from the advantages of WOLF thermal rotary heat exchangers

- The shortest possible installed length
- Tightness rate of 98% [the highest on the market] thanks to the patented WOLF labyrinth seal
- Perfect functionality together with the WOLF Clima Split system
- Frost-proof; little to no condensate through moisture extraction
- Much lower pressure drops than other heat recovery systems (HRS), leading to lower energy requirements
- No condensate removal required
- Available as condensation, enthalpy or sorption rotor (WOLF recommendation, with the additional effect of moisture recovery in winter and pre-cooling in summer)

COMFORT VENTILATION UNIT WITH ROTARY HEAT EXCHANGER

SPECIFICATIONS

CRL - iD

FOR INDOOR INSTALLATION WITH VERTICAL/HORIZONTAL DUCT CONNECTION

Optimum efficiency through the use of rotary heat exchangers with patented WOLF labyrinth seal and a leakage rate of under 2%

Easy handling thanks to compact dimensions, the ability to split up the unit (from CRL-3500) and the components of the WOLF Easy Lifting System

Connect and go with the control system customised to the unit

Numerous extension options, e.g. silencers, heating and cooling coils or integration with building management systems

Heating - cooling - ventilation in perfect harmony with the optional WOLF Clima Split system

COMFORT VENTILATION UNIT WITH ROTARY HEAT EXCHANGER

SPECIFICATIONS

CRL - A evo max

OUTDOOR UNIT (WEATHERPROOF) WITH HORIZONTAL DUCT CONNECTION

Optimum efficiency through the use of rotary heat exchangers with patented WOLF labyrinth seal and a leakage rate of under 2%

Short installed length due to internal shut-off dampers

Easy handling thanks to compact dimensions, the ability to split up the unit (from CRL-3500) and the components of the WOLF Easy Lifting System

Easy commissioning thanks to installed connection panel with connection flanges and test connectors integrated as standard

Connect and go with the control system customised to the unit

Numerous extension options, e.g. silencers, heating and cooling coils or integration with building management systems

Heating, cooling and ventilation in perfect harmony with the optional WOLF Clima Split system

COMFORT VENTILATION UNIT WITH ROTARY HEAT EXCHANGER

COMFORT VENTILATION UNIT WITH ROTARY HEAT EXCHANGER

UNIT DESIGNS

CRL - A

To meet different thermodynamic (heating, cooling) and acoustic (sound) requirements, our CRL sizing program offers the option of individual configuration [specifications and delivery time on request].

Example: CRL with fitted silencer and heating coil - cooling coil - drop eliminator modules

Key:

A Outdoor air (ODA)	4 Control panel	10 Outdoor air silencer module
B Exhaust air (EHA)	5 Repair switch	11 Base frame
C Extract air (ETA)	6 Extract air filter	12 Rotary heat exchanger
D Supply air (SUP)	7 Extract air silencer module	13 EC fan, supply air
1 Intake hood with mist eliminator	8 Condensate pan	14 Heating coil
2 Discharge hood	9 Outdoor air filter	15 Cooling coil
3 EC fan, extract air		16 Drop eliminator

COMFORT VENTILATION UNIT WITH ROTARY HEAT EXCHANGER

UNIT DESIGNS

CRL - A

Access side in supply air direction, left

Access side in supply air direction, right

¹ For CRL-A-1300/-2500/-3500, these versions are available with a boost damper.

² CRL-A evo max types are available in these versions.

³ These versions are only available for CRL-A evo max units.

COMFORT VENTILATION UNIT WITH ROTARY HEAT EXCHANGER

COMPONENT DESCRIPTION

CASING

CRL-iD/iH/iDH with feet as standard, height 170 mm (height adjustable to 30 mm), CRL-A with base frame height 305 mm.

CRL-iH evo max with optional internal frame, height 250 mm (height adjustable).

CRL-A evo max with C base frame as standard, height 180 mm. With optional structural base frame for lifting from beneath, height 200 mm.

Duplex casing/inspection doors/panels made of powder-coated sheet steel, with core of 50 mm thick thermal insulation.

Colours: traffic white RAL 9016 and silver RAL 9006.

Optimum sound and thermal insulation through mineral wool, building material category A1, non-combustible to DIN 4102.

Inspection doors extending across the entire operating height of the unit ensure excellent access to fitted parts. The access side can be selected.

MOTOR/FAN UNIT FOR SUPPLY AND EXTRACT AIR

High efficiency, free-running fans with single sided intake, directly connected to EC motors with low energy consumption, infinitely variable [0-10 V]

Complete motor/fan unit statically and dynamically balanced

Fan/motor combination with very low noise levels

Anti-blocking protection

Soft start

Short circuit protection

Excess temperature protection for motor and electronics

HEAT RECOVERY

Heat recovery via high performance rotary heat exchanger (RHE)

- Temperature transfer rate up to 90% (dry)
- Maximum tightness thanks to labyrinth seal that rotates with rotor
- Two central seals in multistage cascade (upstream and downstream)
- Tightness rate of over 98% in accordance with VDI 3803/5, improving efficiency of fans
- Heat exchanger made from corrosion-resistant aluminium alloy
- Self-cleaning heat exchanger based on countercurrent principle
- Variable control of rotor speed for optimised performance

Summer mode for cooling recovery and energy-efficient night ventilation

Optionally:

- Sorption rotor for increased transfer of air humidity and heat/cold with return humidity coefficients of over 90%
- Enthalpy rotor for transfer of air humidity and heat/cold
- Condensation rotor for heat/cold transfer

Outdoor air filter (fine dust and pollen filter)

Long service life thanks to extensive filter surface area

Temperature-resistant to 60°C

Differential pressure limiter for filter monitoring fitted and wired as standard. Easy to replace filter, washable

Extract air filter

Long service life thanks to extensive filter surface area

Temperature-resistant to 60°C

Differential pressure limiter for filter monitoring fitted and wired as standard. Easy to replace filter, washable

Boost damper

Optional quick heating damper integrated into the unit

For energy-efficient and quick heating to the set temperature

COMFORT VENTILATION UNIT WITH ROTARY HEAT EXCHANGER CONTROL

The microprocessor-controlled control unit with isolator (located within the unit for CRL evo max and on the unit for CRL) is fully assembled and wired at the factory. It controls and regulates the fans, heat recovery, temperatures, flow rates and operating times, as well as a variety of internal functions and alarms.

Function	Description
Languages	Language selection with menu prompts
Preheating program	When outside temperatures are low (adjustable setting), the heating circuit will heat up first when the system is started up. This ensures that when there is a risk of frost the heating coil is not damaged and cold air is not blown in
Backup mode, heating and cooling	In off mode; minimum and maximum room temperature limits are maintained (unoccupied periods)
Night ventilation/cooling function	The building can be cooled to an adjustable set value during the night, using cooler outdoor air (unoccupied periods)
Burner demand via contact	Heat demand is issued to Wolf boilers via the floating contact
Summer compensation	As outside temperatures rise, the set value for the room temperature is adjusted to track the outside temperature
Alarm history	Date and time of faults are logged (10 messages)
Standstill protection	To stop mixers and pumps seizing up, they are activated once a week (service function, adjustable start time)
CO ₂ or VOC control	The speed is matched as appropriate via the CO ₂ content of the air
Constant pressure control	Constant pressure control in the extract or supply air duct possible, differential pressure sensor mounted in the unit
Flow rate control	Differential pressure sensor mounted in the unit to control constant air volume
Time program for the day	Setting of four day programs, each with five switching times with different set values for temperature, speed and pressure
Switching times per day	Five start times and five stop times can be set
Filter monitoring (contamination check)	Checks the barometric cells for supply and extract air (adjustable start time, service function)
Fire alarm connection	When fire alarm devices are triggered, the system shuts down (adjustable)
Outdoor/exhaust air damper switching	230 V OPEN/CLOSE switching by controller
Outside temperature sensor	Outside sensor for direct connection to controller (always required)
Supply air temperature control	Supply air is controlled according to the set value.
Supply air - indoor air control	Room temperature control via room sensor
Supply air - extract air control	Room temperature control via extract air sensor
Floating central fault message contact	All accumulating faults are transferred via this contact
Variable valve control, cooling/heating	Control of valve drives with 0-10 V DC
External system start	Remote On/Off
Operating modes	Automatic mode, manual mode, off mode (unoccupied periods), standby (Off), BMS mode
Infinitely variable motor control	Balance adjustment option for fans (extract air management)
RHE, cooling via HR (heat recovery)	RHE with 0-10V DC control
Quick heating function	Air flow to 100% with boost damper ODA/EHA damper closed. Extr. fan out of action
Electric preheating coil (filter pre-dryer)	Start point + 5°C
Frost protection function, heating coil (PWW)	Frost stat on the heating coil; when triggered, the fan switches off and the heating coil is purged
Holiday program	Additional time program for the aforementioned operating modes
Summertime/winter time change	Automatically subject to date
Supply air minimum limit	Included in all control unit versions; the supply air temperature does not fall below an adjustable limit
Programming unit with FSTN graphics	The programming unit can also be used as a remote control with display function

COMFORT VENTILATION UNIT WITH ROTARY HEAT EXCHANGER

CONTROL ACCESSORIES

AIR QUALITY SENSOR

Plug-in design; mixed gas sensor for capturing air quality in offices, hotels, homes, businesses, restaurants, etc.

Supply voltage:	24V AC/DC
Sup. ambient temperature:	0-50°C
IP rating:	IP30
Dimensions:	81 x 79 x 26 mm

CO2 SENSOR (ALTERNATIVE TO AIR QUALITY SENSOR)

Plug-in design, for capturing the CO2 content

Supply voltage:	24V AC/DC
Sup. ambient temperature:	0-50°C
IP rating:	IP30
Dimensions:	95 x 97 x 30 mm

ROOM TEMP SENSOR

Wall mounted, 2-pole, terminals up to 1.5 mm²

Sensor:	NTC5K
Measuring range:	-30°C to +50°C
IP rating:	IP54
Dimensions:	100 x 60 x 33 mm

OUTSIDE TEMP SENSOR

Wall mounted, 2-pole, terminals up to 1.5 mm²

Sensor:	NTC5K
Measuring range:	-30°C to +50°C
IP rating:	IP54
Dimensions:	100 x 60 x 33 mm

DUCT HYGROSTAT

Type KH-10U with wall retainer WH-20, internal setting

Measuring range:	35 to 100% RH
IP rating:	IP65
Dimensions:	107 x 70 x 97 mm

ROOM HYGROSTAT

Type RH-2U for wall mounting or on flush box, internal setting

Measuring range:	25 to 95% RH
IP rating:	IP30
Dimensions:	95 x 97 x 30 mm

WOLF LINK PRO

External LAN/WLAN interface module for remote access over the local network or Internet.

Operation	App [Android or iOS], Browser, PC application
Encryption	TLS1.2
Mounting type	Wall mounting
IP rating	IP30
Dimensions	160 x 83 x 31 mm (H x W x D)

COMFORT VENTILATION UNIT WITH ROTARY HEAT EXCHANGER

CONTROL ACCESSORIES

LON INTERFACE FOR WRS-K FOR PLUGGING INTO THE CONTROLLER KLM

For communication between the control unit and the building management system using LON standard network variables, designed as an expansion card, integrated into the DDC control unit. Transceiver FTT-10A/78 kbit/s. Connection via plug-in/screw terminals.

Module is integrated into the existing BMS on site.

BACNET INTERFACE FOR WRS-K FOR PLUGGING INTO THE CONTROLLER KLM

For communication between the control unit and the building management system, designed as an expansion card, integrated into the DDC control unit.

Supported protocols: BACnet Ethernet/BACnet IP. Connection via RJ45 interface.

Module is integrated into the existing BMS on site.

ETHERNET INTERFACE FOR WRS-K FOR PLUGGING INTO THE CONTROLLER KLM

For linking the control unit into an Ethernet network (LAN), designed as an expansion card, integrated into the DDC control unit.

Supported protocols: HTTP/FTP. Connection via RJ45 interface.

Module is integrated into the existing network on site.

MODBUS INTERFACE FOR WRS-K FOR PLUGGING INTO THE CONTROLLER KLM

For communication between the control unit and the building management system, designed as an expansion card, integrated into the DDC control unit.

Supported protocols: BACnet Ethernet/BACnet IP. Connection via RJ45 interface.

Module is integrated into the existing BMS on site.

KNX INTERFACE FOR WRS-K FOR PLUGGING INTO THE CONTROLLER KLM

For communication between the control unit and the building management system, designed as an expansion card, integrated into the DDC control unit.

Connection via screw terminals, 2-pole.

Module is integrated into the existing network on site.

BMK-T10 TOUCH PANEL

Enables operation of several CRL units, trend recordings, front installation on site

BMK-F REMOTE CONTROL

For wall mounting with integral room temperature sensor

Six function keys: On/Off, manual/auto, speed, fresh air, utilisation time extension, intermittent ventilation. LCD display. Fault indication, 24 V AC power supply, RS485 interface (pLAN), IP rating IP 30. Functions: Switching the unit on/off, speed setting, specifying fresh air proportion, activating utilisation time extension, activating intermittent ventilation, adjusting set temperature. Dimensions: 135x86x30 mm

COMFORT VENTILATION UNIT WITH ROTARY HEAT EXCHANGER
HEATER BANK

ELECTRIC PREHEATING COIL

- Single stage for filter pre-drying, fully wired with HLSC
- Frost stat and mounting bracket; activates when temperature goes below 5°C
- Can be retrofitted to standard unit

Size	Output (kW)	Voltage
CRL-1300	1	1x 230 V/50 Hz
CRL-2500	2	2x 230 V/50 Hz
CRL-3500	4	2x 230 V/50 Hz
CRL-4800	4	2x 230 V/50 Hz
CRL-6200	6	3x 400 V/50 Hz
CRL-9000	8	3x 400 V/50 Hz
CRL-11000 evo max	13.5	3x 400 V/50 Hz
CRL-13500 evo max	18	3x 400 V/50 Hz
CRL-16500 evo max	18	3x 400 V/50 Hz
CRL-19500 evo max	24	3x 400 V/50 Hz

ELECTRIC REHEATING COIL

for increasing supply air temperature, installed and fully wired

Size	Output (kW)	Voltage
CRL-1300	1	1x 230 V/50 Hz
CRL-2500	4	3x 400 V/50 Hz
CRL-3500	8	3x 400 V/50 Hz

PWW HEAT EXCHANGER (PUMPED HOT WATER)

- for CRL standard unit horizontal air routing for supply air versions can be retrofitted below
- CU-Al heat exchanger for supply air re-heating, wired with frost protection

Size	
CRL-1300	Frost thermostat fully wired
CRL-2500	Frost thermostat fully wired
CRL-3500	Frost thermostat fully wired
CRL-4800	Frost thermostat fully wired
CRL-6200	Frost thermostat fully wired
CRL-9000	Frost thermostat fully wired

COMFORT VENTILATION UNIT WITH ROTARY HEAT EXCHANGER

TECHNICAL INFORMATION

Indoor air quality

Indoor air quality is determined by the following three factors (see also EN 15251 or EN 13779):

- **Emissions from persons and their activities**
Carbon dioxide emissions from persons' respiration, biological vapours, smoking, personal hygiene products, etc.
- **Emissions from the room**
Vapours from furniture, carpets, paint, adhesives, etc.
- **Outdoor air conditions**
Rural areas, urban areas, dust, fine dust, pollen, etc.

Design criteria

In accordance with EN 15251, various categories are used for indoor air quality and ventilation rate criteria.

Description of the applicability of the various Categories

Category	Description
1	High level of expectation is recommended for spaces occupied by very sensitive and fragile persons with special needs like disabled, sick, very young children and elderly persons.
2	Standard level of expectation should be applied to new and renovated buildings.
3	An acceptable, moderate level of expectation may be applied to existing buildings.
4	Values outside the criteria for the above categories: This category should only be accepted for a limited part of the year.

As the carbon dioxide concentration rises, the ability to concentrate and perform declines, tiredness increases and people feel uncomfortable.
Carbon dioxide is a natural constituent of the earth's atmosphere and is found in outdoor air in concentrations ranging from around 350 ppm (rural areas) to around 500 ppm (urban areas).

COMFORT VENTILATION UNIT WITH ROTARY HEAT EXCHANGER

TECHNICAL INFORMATION

CO₂ level in indoor environments to EN 15251 or EN 16798-3

The following table from DIN EN 16798-3 shows the recommended minimum values for the outdoor air flow rate per person. The design air flow rate also takes emissions from other sources into account, such as building materials and furniture.

		Outdoor air flow rate							
		Non-smoking area				Smoking area			
Category	Unit	Standard area		Standard value		Standard area		Standard value	
1	l/s/person m³/h/person	> 15	> 54	20	72	> 30	> 108	40	144
2	l/s/person m³/h/person	10-15	36-54	12.5	45	20-30	72-108	25	90
3	l/s/person m³/h/person	6-10	21.6-36	8	28.8	12-30	43.2-108	16	57.6
4	l/s/person m³/h/person	< 6	< 21.6	5	18	< 12	< 43.2	10	36

Minimum air volumes per person (basis max. CO₂ demand)

Age-dependent rates			
For approx. age	Target 1200 ppm	Target 1000 ppm	Target group
0-6	19 m³/h	25 m³/h	Kindergarten
6-10	19 m³/h	25 m³/h	Primary school
10-14	23 m³/h	30 m³/h	Secondary school
14-19	24 m³/h	33 m³/h	Technical college
Adults	28 m³/h	37 m³/h	

COMFORT VENTILATION UNIT WITH ROTARY HEAT EXCHANGER

TECHNICAL INFORMATION

Example calculations

$$l/s \times 3.6 = m^3/h$$

Example 1:

School, two classrooms, each with 30 children aged 6-10 and one teacher

Required air volume per room, according to max. CO₂ requirement of 1200 ppm

Calculation:	2 x 30 people x 19 m ³ /h	= 1140 m ³ /h
	2 x 1 teacher x 28 m ³ /h	= 56 m ³ /h
Required outdoor air volume:		= 1196 m ³ /h

Example 2:

Required interior category: 3 - Non-smoking area (standard value)
40 people

Air volume per room:

Calculation:	40 people x 8 l/s	= 320 l/s
--------------	-------------------	-----------

Required outdoor air volume: = 320 l/s = 1152 m³/h

Notes:

If greater air volumes are required, units from our KG Top range of air handling units can be used.

Criteria for indoor noise levels
according to DIN EN 15251 or DIN
EN 16798-3

Type of building/room	Recommended sound pressure range (dB(A))
Open-plan office	35-45
